PROFESSIONAL SUMMARY

Full Stack MERN Developer skilled in creating scalable web applications, secure REST APIs, authentication systems, and responsive frontend interfaces using React.js, Node.js, Express.js, and MongoDB. Experienced in Redis caching, Cloudinary integration, reusable MVC architecture, and frontend performance optimization.

EDUCATION

Integral University, Lucknow

Master of Computer Applications (MCA) – 83% | 2024 – 2026

Jamshedpur Workers College, Kolhan University

Bachelor of Computer Applications (BCA) – 74.63% | 2021 – 2024

PROJECTS

Portfolio Website

- Crafted a modern animated developer portfolio using React.js, GSAP, and Lenis featuring 8+ interactive UI transitions and responsive layouts.
- Integrated smooth scrolling effects, animated UI interactions, and responsive layouts enhancing frontend engagement and visual experience.
- Enhanced frontend rendering performance by modularizing 10+ reusable components improving maintainability and UI responsiveness.
- Deployed the portfolio using GitHub and Vercel enabling streamlined project hosting and continuous updates

Educational Platform

- Created 12+ reusable dashboard and CMS components using React.js and Bootstrap to streamline content management workflows.
- Architected 20+ RESTful APIs supporting authentication, CMS operations, media handling, and scalable user management workflows
- Managed Cloudinary-based media storage supporting 20+ assets with optimized image delivery workflows
- Structured 10+ modular controllers, middleware layers, and route handlers while reducing backend code redundancy and improving scalability
- Designed 8+ responsive React.js pages ensuring consistent performance across desktop and mobile devices.
- Optimized API performance using Redis caching, improving response speed by ~35% and reducing repeated database requests.

Banking Ledger System

- Architected a modular banking ledger backend using scalable REST API infrastructure.

- Integrated JWT authentication and role-based authorization securing 8+ protected API endpoints and user access workflows.
- Engineered account management and transaction processing modules supporting secure financial operations across backend workflows.
- Designed scalable MongoDB schemas and reusable MVC architecture improving backend maintainability and database efficiency.
- Integrated validation and centralized error-handling middleware across 8+ API routes improving backend reliability and request security.

TECHNICAL SKILLS

- Frontend: HTML, CSS, JavaScript, React.js, Redux, Bootstrap, GSAP, Framer Motion, Lenis
- Backend: Node.js, Express.js, MongoDB, REST APIs, JWT Authentication, Mongoose, Redis, TypeScript
- Tools & Deployment: Git, GitHub, Docker, Linux, Render, Vercel, Cloudinary, Postman
- Core Concepts: MVC Architecture, SOLID Principles, API Integration, CRUD Operations, Responsive Web Design

ADDITIONAL INFORMATION

- Languages: English, Hindi
- Strong understanding of scalable MERN architecture and responsive UI development.
- Built multiple full-stack MERN projects focused on scalable backend systems, responsive UI development, and REST API architecture.
